

VENKATESH BANDARU

Node.js Backend Developer

+91-9966109979 | venkatesh.bandaru282@gmail.com | linkedin.com/in/venkateshb53

PROFESSIONAL SUMMARY

Node.js Backend Developer with 3+ years of experience designing and developing scalable backend applications, RESTful APIs, and microservices using Node.js, Express.js, and Fastify. Proficient in PostgreSQL, MongoDB, Redis, and third-party API integrations. Experienced in WebSocket real-time streaming, cron job automation, performance optimisation, and production support. Strong debugging and problem-solving skills with a track record of delivering high-availability, low-latency systems in fast-paced environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Node.js

Backend Frameworks: Express.js, Fastify

Frontend: React.js (MERN, PERN Stack)

Databases: PostgreSQL, MongoDB, Redis — schema design, query optimisation, indexing

APIs & Protocols: RESTful APIs, WebSocket (real-time), Third-party API integration, Swagger / OpenAPI

DevOps & Tools: Docker, CI/CD (GitHub Actions), AWS, Git, GitHub, Bitbucket, Postman, SourceTree

Concepts: Microservices, Cron Jobs, Background Job Processing, Performance Optimisation, System Design

PROFESSIONAL EXPERIENCE

Media Jigs (Remote) — Node.js Developer | July 2024 – Present

- Designed and optimised database queries and data-fetching strategies using Node.js and PostgreSQL, improving API performance and eliminating redundant database calls.
- Implemented file upload functionality, request validation middleware, and centralised error handling for production REST APIs, improving reliability and maintainability.
- Integrated third-party APIs to automate data synchronisation between systems, reducing manual intervention.
- Collaborated with frontend developers and documented all endpoints using Swagger / OpenAPI for clear API contracts.

Versatile Mobitech (Versatile IT Solutions) — Junior Node.js Developer | June 2022 – April 2024

- Developed and deployed scalable backend services and reusable RESTful APIs using Node.js and Express.js, improving code maintainability and reducing development time.
- Performed debugging, performance profiling, and production optimisation, supporting stable and timely release cycles.
- Collaborated with cross-functional teams including frontend, QA, and DevOps for feature development and deployment.

KEY PROJECTS

Sportish — Live Sports Scoring & Commentary Platform | Node.js · Fastify · PostgreSQL · WebSocket | July 2024 – Present

- Architected and maintained scalable backend services supporting real-time match data processing for multiple concurrent live matches on a high-availability platform.
- Consumed third-party sports APIs to automate ingestion of match data, team details, player statistics, and commentary — removing manual data update workflows.

- Implemented WebSocket streaming for real-time client push updates and built cron jobs to automate scheduled data imports, improving processing efficiency.

4TP — Home Services Marketplace | *Node.js · Express.js · MongoDB* | *Nov 2022 – Oct 2023*

- Built RESTful APIs for service requests, quotations, user management, and provider responses, improving request handling and overall platform performance.
- Enabled location-based provider matching with real-time notifications and managed MongoDB schemas for efficient service and user data retrieval.

Medicos-DX — Hospital Management System | *Node.js · Express.js · MongoDB* | *May 2023 – Jan 2024*

- Built backend services to manage patient medical history, doctor visits, and prescription records using Node.js, Express.js, and MongoDB.
- Delivered secure RESTful APIs for patient record management, visit tracking, and prescription data with efficient querying and safe data storage.

EDUCATION

MBA | Swarnandra College of Engineering and Technology | Graduated: 2021 | GPA: 8.15
